

Our Best Seller - Roll'n Multiply

- Teaches players multiplication skills and strategies
- Enables players to multiply as high as 100
- Encourages cooperative and interactive learning
- Challenges various skill levels
- Allows players to work in a group or independently

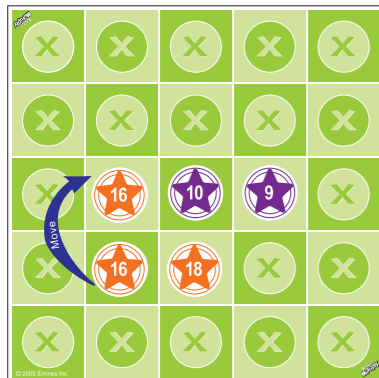

Goal of the game

- ♦ Be the first player to have 4 playing pieces in a row

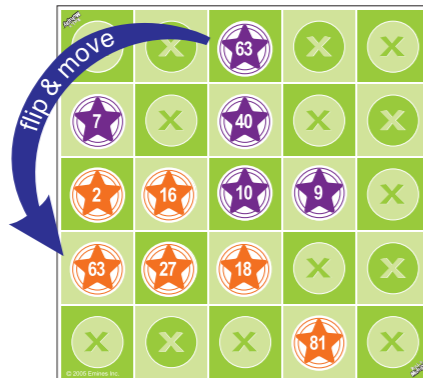

How to play the game:

- ♦ Roll 2 dice, multiply the numbers, check the answer against the multiplication table, and place your corresponding game piece on the board.

If your playing piece is already on the board — move it to a more strategic position or leave it in the same spot.

If your opponent's playing piece is blocking your path — flip it to your colored side, then move the piece or leave it in the same spot.

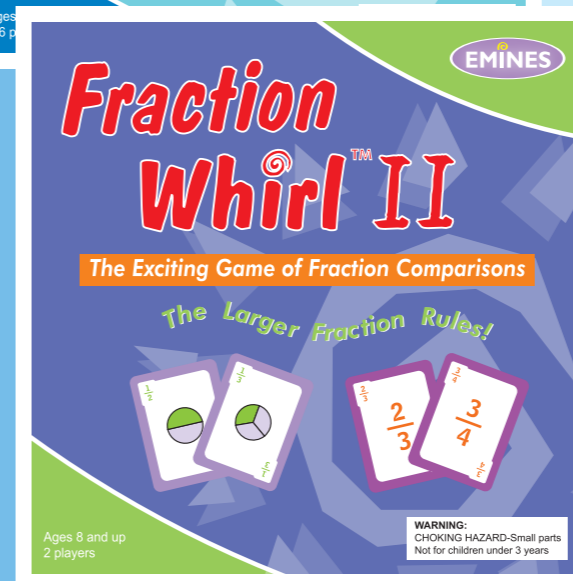

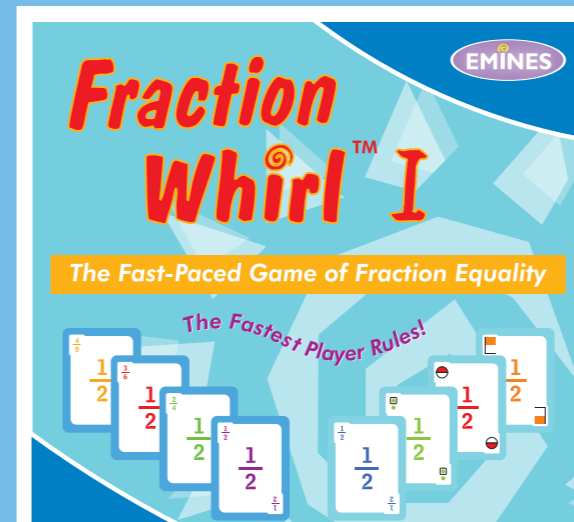

WIN with 4 playing pieces in a row!

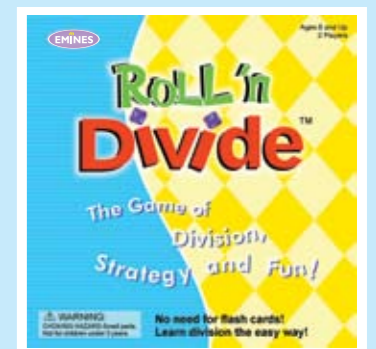

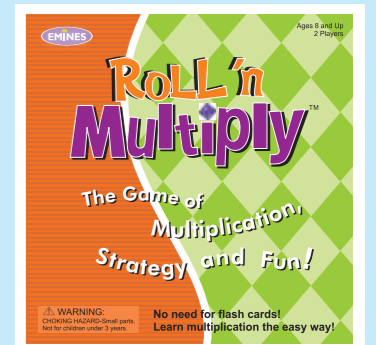

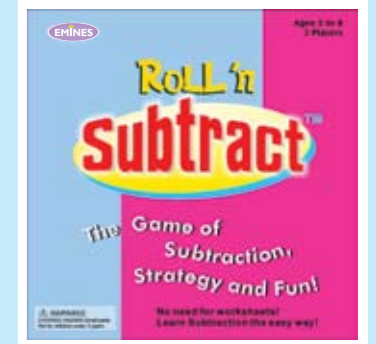

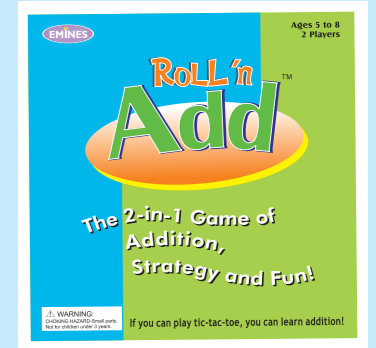

Each of our games introduces different basic math skills and reinforces math concepts necessary to succeed in school. The games are fun and can easily fit into small slots of extra time in the classroom or at home.

In the classroom, our games encourage cooperative learning in highly motivating ways. They provide young students with early and valuable experience in working and solving problems together.

At home, playing our games will help you interact and have fun with your children! These math games provide a much-needed opportunity to talk, laugh, and develop key memories and family traditions - in addition to learning mathematics.
